PHYSICIANS NAME : _____ **PHONE:** _____

Permanent Makeup Technician makes no attempt to, or to claim to practice medicine. Some individuals will have complications related to permanent makeup application. These conditions are usually mild and last only a few days; however, extreme complications are always possible. If you are healthy and there are no visible reasons restricting you from receiving a tattoo, you must approve of the design and color before the application of your permanent makeup. Permanent makeup procedures are affected by the canvas that they are performed on. If your skin is sundamaged, thick or uneven in texture, or excessively dry or oily, the result cannot be expected or predicted to be perfect or to follow normal healing guidelines. Scars on the lips from fever blisters may cause pigment removal. Touch-ups may be needed at 6-8 weeks after initial visit to ensure the satisfactory result and to keep your permanent makeup looking its best. Your procedure aftercare and maintenance, as outlined in your pre/post procedure directions is very important.

PLEASE READ AND INITIAL THE FOLLOWING STATEMENTS

INITIAL

- I understand that the process used to apply color is not always a one step process and may require subsequent visits to achieve desired results. I further understand that my initial procedure cost includes my first visit and one follow-up/perfecting visit that MUST be between 6 -12 weeks post-procedure. Anytime beyond that time will result in a fee for a followup visit. _____
- I understand that with time, pigment can and will fade and change color according to metabolism, age, skin type, medications, smoking, alcohol, sun exposure, and with the use of Retin A and Acidic skin care products. _____
- I acknowledge that no guarantees have been made to me concerning the results of this procedure, and that the technician has recommended to me a NATURAL LOOK. _____
- I understand the nature of the procedure and possible complications or adverse effects that may occur as a result of the applied pigments or when aftercare instructions are not strictly adhered to. _____
- I fully understand this is a tattooing process, and therefore is an art, not a science. Furthermore, I understand that while symmetry is the goal, but absolute perfection may be unrealistic. _____
- I will receive a copy of and acknowledge my post care instructions. I agree to adhere to these instructions. _____
- I accept responsibility in helping to determine shape, color, and position of the pigments that will be applied. I understand that the actual outcome may be slightly different due to the tone, texture and color of my skin. _____
- I understand before and after pictures are required, but full face images will never be shared without consent. _____
- It is not reasonably possible to determine if I will have an allergic reaction to any of the pigments, dyes, topicals or processes used in the procedure(s). I have informed technician of any previous reactions or existing medical problems. _____
- I realize my body is unique and the technician cannot predict how my skin may react before or after procedure. _____
- I acknowledge that the procedure will result in a permanent change to my appearance and no guarantees have been made to later remove the result. _____
- I understand future laser or other skin altering procedures such as plastic surgery, implants, and/or injections may alter or degrade my permanent makeup. I further acknowledge that those changes are not to the fault of my permanent makeup technician. Any such change may not be correctable through future permanent makeup procedures. _____
- I acknowledge that permanent makeup is my choice alone, and that I am not under the influence of anyone or anything that may sway my decision. I consent to the risks and application, and to any action or conduct of the technician as deemed by them as reasonably necessary to perform the procedure(s). _____

By signing below, I acknowledge that I have been given full opportunity to ask any and all of the questions I may have. I also acknowledge that my questions have been answered to my full satisfaction.

POST PROCEDURE CARE

EYELINER:

Expect light to moderate swelling and redness. Expect color to appear crisp and somewhat sharp. Ice Packs should be used to minimize swelling the day of, and the day after procedure. Keep lightly glossed with a thin coat of healing ointment provided for 2-3 days following the procedure. Apply with very clean, just washed hands. You MUST use a NEW mascara to avoid contamination, but no mascara is to be used for a minimum of 5 days. Wash with water only and pat dry for first 24-48 hours.

EYEBROWS:

Expect slight swelling, thickness, and redness for 1-2 days following procedure. Expect color to appear crisp and somewhat sharp. You MUST blot away any lymph or blood. This will help the healing process. For further instructions, please refer to the after care card in your healing kit.

LIPLINER / LIP TINT:

Expect moderate swelling at least 1-2 days following procedure. Applying ice for the first 2 hours immediately after procedure is critical, continuing as much as possible the entire first day. Use provided healing ointment on the treated area for 5-7 days following the procedure, beyond that point, a NEW, uncontaminated lip balm or chapstick (spf 15 or higher) may be used instead. Apply with very clean, just washed hands.

After procedure, lips will appear to have too much color, and after 3-4 days the color will become lighter as the epidermis sloughs off.

At some point during the healing, you will appear to have lost most of your color; however, when your lips have healed completely the dermal layer will gradually appear darker. Two to three applications may be required to achieve desired result. It is not uncommon to lose 70% of the color on the first application.

SCAR CAMOUFLAGE:

Keep area away from water for 24 hours. Use provided sterile Vaseline around the treated area for 3-5 days following the procedure. No vigorous exercise for 24 hours.

REMEMBER:

- Do not use too much ointment. Only a thin layer is needed, the skin needs to “breathe”.
- Do not use ANY Retin A, Glycolic or Salicylic acid products while healing.
- Do not use Peroxide or Neosporin on any treated area.
- Do not Scrub or Pick treated area.
- Do not expose treated area to direct sunlight or tanning beds for at least 5 days.
- Avoid Facials, Swimming and/or Whirlpools for 5 days.
- Avoid gardening or yardwork for 5 days.
- Do not dye, wax, or tweeze eyebrows for one week before or after procedure.

FAILURE TO FOLLOW POST- PROCEDURE INSTRUCTIONS MAY RESULT IN LOSS OR DISCOLORATION OF PIGMENT. Known possible reactions and/or complications from micro- pigmentation are redness, swelling, puffiness, bruising, dry patches, and tenderness. It is normal to lose approximately 1/3 of the color during the healing process. After initial procedure, the color may appear too dark; in approx. 6 days the color may appear too light; once healed the true implanted color will begin to show.

PLEASE DO NOT HESITATE TO CALL WITH ANY QUESTIONS OR CONCERNS!

By signing below, I accept responsibility for determining the color, shape, and position of the pigments that will be applied. I understand the actual color of the pigment may be modified slightly due to the tone and color of my skin. I acknowledge that no guarantees have been made to me concerning the results of this procedure and that the professional recommendation is a natural look. I understand the nature of the procedure and possible complications or adverse effect that may occur as a result of applied pigments. I fully understand that this is a tattooing process and is therefore not a science, but an art.
